

AMENDMENTS TO THE DRAWINGS

The Examiner has objected to the drawings indicating that the application admits of illustration by a drawing to facilitate understanding of the invention. Specifically, the Examiner has indicated that the statement in the specification that "a preferred embodiment of the instant invention is described, in part, with reference to Figures 1 and 2 showing the display and the storage system of the prior art" does not clearly distinguish the elements of the instant invention from the admitted prior art. Amendments are made herein to the specification to further distinguish the elements of the instant invention from the prior art shown in Figures 1 and 2.
